ABOUT

A Web Developer and an enthusiastic coder, with working experience of around 1+ years in web applications development along with various new technologies like Laravel, Vue js, javascript library and shopify. I am always energetic and eager to learn new technologies. I am a very dedicated, self-driven individual, quick learner, and a team player

EXPERIENCE **CodeSense Technology** (Mar 2021- Present)

My main contribution was in a project which was basically a Framework that lets a user Login authentication multi auth and Role and Permission they need without having any technical knowledge.

- Learned Javascript, Backend Laravel Framework.
- Using Laravel Package Spatie role and Permission and Log Viewer For Use Activity in site.
- Worked on Laravel Starter Kit system which is a web application developed in Laravel manages organization User Authentication, User Role and Role has many Permissions manages User All Activity.

I-Tech Infonet (June 2020 – jan 2021)

- image processing and Epub creating Work.
- In this organization help for advance level css and javascript and Html and create e-book publication.
